

INDEX METHODOLOGY

ISE CLEAN EDGE WATER INDEX™

HHO

INDEX DESCRIPTION

The ISE Clean Edge Water Index is designed to track the performance of companies that derive a substantial portion of their revenues from the potable water and wastewater industry, as determined by Clean Edge. Industry exposure includes water distribution, infrastructure (pumps, pipes and valves), water solutions (purification and filtration), and ancillary services such as consulting, construction and metering.

SECURITY ELIGIBILITY CRITERIA

Eligible security types

Eligible security types generally include common stocks, ordinary shares, and depositary receipts.

If the security is a depositary receipt representing a security of a non-U.S. issuer, then references to the “issuer” are references to the issuer of the underlying security.

Multiple classes of securities

One security per issuer is permitted. If an issuer has multiple otherwise-eligible securities, one of which is an Index Security as of the Reconstitution Reference Date, only that security may be eligible; otherwise, only the security with the highest three-month average daily dollar trading volume (ADDTV) may be eligible.

Eligible exchanges

A security must be listed on the Nasdaq Stock Market, the New York Stock Exchange, NYSE American, or the CBOE Exchange.

Industry or sector eligibility

The issuer of the security must derive a substantial portion of their revenues from the potable water and wastewater industry, as determined by Clean Edge.

Market capitalization eligibility

An issuer must have a market capitalization of at least \$100 million (USD).

Liquidity eligibility

Each security must have a three-month ADDTV of at least \$500 thousand (USD).

Seasoning eligibility

Each security must have traded for at least three months on an index-eligible exchange prior to the Reconstitution reference date.

Float eligibility criteria

At least 20% of a security's total shares outstanding must be publicly available for trading (float shares).

Other eligibility criteria

If, at reconstitution, Nasdaq becomes aware that an issuer or security will soon undergo a fundamental change that makes it ineligible, Nasdaq will remove the security from consideration. This includes entering into a definitive merger or acquisition agreement or other pending arrangement that would make it ineligible for Index inclusion, or a filing of bankruptcy or similar protection from creditors.

INDEX CALENDAR

Reconstitution schedule

Nasdaq selects constituents semi-annually in March and September.

Reconstitution reference dates

The Security Eligibility criteria are applied using market data as of the end of February and August, respectively.

Reconstitution announcement dates

Index Reconstitution changes are announced in early March and September.

Reconstitution effective dates

Index Reconstitution changes become effective at market open on the trading day after the third Friday in March and September, respectively.

Rebalance schedule

The Index is rebalanced semi-annually in conjunction with the Index Reconstitution in March and September.

Rebalance reference dates

The Index Rebalance uses market data as of the end of February and August, respectively.

Rebalance announcement dates

Index Rebalance changes are announced in early March and September.

Rebalance effective dates

Index Rebalance changes become effective at market open on the trading day after the third Friday in March and September, respectively.

Holiday schedule

The Indexes are calculated Monday through Friday, except on days when the Nasdaq US exchange is closed.

Index calculation and dissemination schedule

The Indexes are calculated during the trading day based on the Last Sale Price and are disseminated once per second from 09:30:01 to 17:16:00 ET. The closing value of the indexes may change up until 17:15:00 ET due to corrections to the Last Sale Price of the Index Securities.

CONSTITUENT SELECTION

Constituent selection process

Securities that meet the eligibility criteria are ranked in descending order by market capitalization and the top 36 securities are selected for inclusion in the index.

CONSTITUENT WEIGHTING

Constituent weighting scheme

The Index is a modified market capitalization-weighted Index.

Constituent weighting process

Index Security weights are assigned according to the following market capitalization rank-based schedule, whereby a rank of 1 represents the highest market capitalization:

- Index Securities ranked 1-10 by market capitalization are assigned weights of 4%.
- Index Securities ranked 11-15 by market capitalization are assigned weights of 3.5%.
- Index Securities ranked 16-20 by market capitalization are assigned weights of 3%.
- Index Securities ranked 21-30 by market capitalization are assigned weights of 2%.
- Index Securities ranked 31-36 by market capitalization are assigned weights of 1.25%.

INDEX MAINTENANCE

Deletion policy

If, at any time during the year other than the Index Reconstitution(s), an Index Security that no longer meets the Eligibility Criteria, or is otherwise determined to have become ineligible for inclusion in the Index, it is removed from the Index. This includes circumstances where an Index Security is determined to be ineligible for continued inclusion in the Index due to bankruptcy, delisting, or a definitive agreement that would likely result in the security no longer being Index eligible. Please refer to Nasdaq's **Corporate Actions and Events Manual – Equities** for detailed handling of the aforementioned event types.

Replacement policy

Index securities deleted at any time during the year other than the Index Reconstitution(s) are not replaced.

Corporate actions

In the interim periods between scheduled index reconstitution events, individual Index securities may be the subject to a variety of corporate actions and events that require maintenance and adjustments to the Index. Specific treatment of each type of corporate action or event is described in Nasdaq's **Corporate Actions and Events Manual – Equities**, which is incorporated herein by reference.

In certain cases, corporate actions and events are handled according to the weighting scheme or other index construction techniques employed. Wherever alternate methods are described, the Index will follow the "Non-Market Cap Corporate Action Method."

Index share adjustments

Other than as a direct result of corporate actions, the index does not normally experience share adjustments between scheduled Index rebalance and reconstitution events.
