

INDEX METHODOLOGY

NASDAQ JUNIOR SILVER MINERS™ INDEX

NMFSM™

INDEX DESCRIPTION

The Nasdaq Junior Silver Miners Index is designed to track the performance of primarily smaller companies engaged in the silver mining industry. Eligible companies include those that derive the majority of their revenues from silver mining, have a significant market share of global silver production, or are principally engaged in exploration and development activities related to new silver production.

SECURITY ELIGIBILITY CRITERIA

Multiple securities per issuer

One security per issuer is permitted. If an issuer has multiple otherwise-eligible securities, only the security with the highest three-month average daily traded value (USD) may be eligible.

Listing exchanges

A security must be listed on an exchange named in Appendix A.

Industries and sectors

Eligible companies include those that derive the majority of their revenues from silver mining, have a significant market share of global silver production, or are principally engaged in exploration and development activities related to new silver production as defined by Metals Focus. All securities are assigned to an individual sector defined by Metals Focus. Eligible sectors include: Project Development, Silver Mining, Streaming, Diversified Mining, Gold Mining, Zinc Mining, and Copper Mining.

Market capitalization

A security not in the Index as of the Reconstitution Reference Date must have a market capitalization of at least \$20 million (USD).

Seasoning

A security must have been traded at least three months prior to the Reconstitution Reference Date.

Liquidity

A security not in the Index as of the Reconstitution Reference Date must have a three-month average daily traded value of at least \$10,000 (USD).

Other eligibility

If, at reconstitution, Nasdaq becomes aware that an issuer or security will soon undergo a fundamental change that makes it ineligible, Nasdaq will remove the security from consideration. This includes entering into a definitive merger or acquisition agreement or other pending arrangement that would make it ineligible for Index inclusion, or a filing of bankruptcy or similar protection from creditors, or other events as described in Section 3 of **Corporate Actions and Events Manual – Equities**.

INDEX CALENDAR

Reconstitution schedule

The Index is reconstituted semi-annually in May and November by applying the Constituent Selection Process to all securities that meet the applicable Security Eligibility Criteria.

Reconstitution reference dates

Unless otherwise specified, the Security Eligibility Criteria and Constituent Selection Process are applied by using data as of the last trading day of April and October.

Reconstitution announcement dates

Index Reconstitutions are announced in early May and November.

Reconstitution effective dates

Index Reconstitutions become effective at market open on the first trading day following the third Friday of May and November.

Rebalance schedule

The Index is rebalanced quarterly in February, May, August, and November.

Rebalance reference dates

Unless otherwise specified, the Security Eligibility Criteria and Constituent Selection Process are applied by using data as of the last trading day of January, April, July, and October.

Rebalance announcement dates

Index Rebalances are announced in early February, May, August, and November.

Rebalance effective dates

Index Rebalances become effective at market open on the first trading day following the third Friday of February, May, August, and November.

Holiday schedules

The Index is calculated Monday through Friday and does not close for holidays.

Index calculation and dissemination schedule

The Index Value is calculated five (5) days a week, Monday through Friday, once per second from the start of the trading day in Tokyo (09:00:01 Japan Standard Time) until the close of the trading day in New York (17:16:00 Eastern Time).

CONSTITUENT SELECTION

Every security that meets all applicable Security Eligibility Criteria is included in the Index.

CONSTITUENT WEIGHTING

Constituent weighting scheme

The Index is a modified theme-adjusted free float market capitalization-weighted index.

Constituent weighting process

Theme-Adjusted Free Float Market Value

A Theme-Adjusted Free Float Market Value is calculated for each Index Security as the product of the Index Security's free float market capitalization and its issuing company's silver revenue percentage, as defined by Metals Focus.

- For a company that is assigned to the 'Project Development' sector, silver revenue is assumed to be 100%.

Weight Calculation

Each Index Security's initial weight is determined by dividing its Theme-Adjusted Free Float Market Value by the aggregate Theme-Adjusted Free Float Market Value of all Index Securities.

Initial weights are then adjusted to determine final weights.

Weight Adjustment

Initial Index weights are adjusted to reduce excessive concentration. The weight adjustment is described below:

- **Step 1:** Raise each Index Security's initial index weight to the power of 0.50 (*Adjusted Initial Weight*)
- **Step 2:** Divide the *Adjusted Initial Weight* from Step 1 by the aggregate *Adjusted Initial Weight* of all Index Securities.

Weight Constraints

Securities are grouped based on their market capitalization at the time of the reference date. Group 1 securities are those that have a full market capitalization in the 90th percentile of the portfolio. Group 2 consists of all other securities.

Weights from Step 2 above are further adjusted on a pro-rata basis such that:

- Aggregate weight of Group 1 securities does not exceed 10% of the total portfolio weight.

Final weights are those determined from applying the weighting constraints above.

For additional information about index weighting, see **Nasdaq Index Weight Calculations**.

INDEX MAINTENANCE

Deletion policy

If, at any time other than an Index Reconstitution, Nasdaq determines that an Index Security has or will undergo a fundamental alteration that would make it ineligible for Index inclusion, the Index Security is removed as soon as practicable. Such alternations may include a merger, acquisition or other major corporate event that would otherwise adversely affect the integrity of the Index.

Corporate actions

In the interim periods between scheduled index reconstitution and rebalancing events, individual Index securities may be the subject to a variety of corporate actions and events that require maintenance and adjustments to the Index. With the exception(s) noted below, specific treatment of each type of corporate action or event is described in **Nasdaq Corporate Actions and Events Manual – Equities**, which is incorporated herein by reference.

In certain cases, corporate actions and events are handled according to the weighting scheme or other index construction techniques employed. Wherever alternate methods are described, the Index will follow the “Non-Market Cap Corporate Action Method.”

Index share adjustments

Other than as a direct result of corporate actions, the Index does not normally experience share adjustments between scheduled Index rebalance and reconstitution events.

ADDITIONAL INFORMATION

Announcements

Nasdaq announces Index-related information via the Nasdaq Global Index Watch (GIW) website at <http://indexes.nasdaqomx.com>.

For more information on the general Index Announcement procedures, please refer to the **Nasdaq Index Methodology Guide**.

Unexpected market closures

For information on Unexpected Market Closures, please refer to the **Nasdaq Index Methodology Guide**.

Calculation types

For information on the Index calculation types as well as the mathematical approach used to calculate the Index(es), please refer to the **Nasdaq Index Policies & Procedures: Calculation Manual – Equities & Commodities**.

Recalculation and restatement policy

For information on the Recalculation and Restatement Policy, please refer to the **Nasdaq Index Recalculation Policy**.

Data sources

For information on data sources and the classification of dividends and associated tax rates, please refer to the **Nasdaq Index Methodology Guide**.

Contact information

For any questions regarding an Index, please contact the Nasdaq Index Client Services team at indexservices@nasdaq.com.

Index dissemination

Index values and weightings information are available through Nasdaq Global Index Watch (GIW) website at <https://indexes.nasdaqomx.com/> as well as the Nasdaq Global Index FlexFile Delivery Service (GIFFD) and Global Index Dissemination Services (GIDS). Similar to the GIDS offerings, Genium Consolidated Feed (GCF) provides real-time Index values and weightings for the Nordic Indexes.

For more detailed information regarding Index Dissemination, see the **Nasdaq Index Methodology Guide**.

Website

For further information, please refer to Nasdaq GIW website at <https://indexes.nasdaqomx.com/>.

FTP and dissemination service

Index values and weightings are available via FTP on the Nasdaq Global Indexes FlexFile Delivery Service (GIFFD). Index values are available via Nasdaq's Global Index Dissemination Services (GIDS).

GOVERNANCE

All Nasdaq Indexes are managed by the governance committee structure and have transparent governance, oversight, and accountability procedures for the Index determination process. For further details on the Index Methodology and Governance overlay, refer to the **Nasdaq Index Methodology Guide**.

GLOSSARY OF TERMS AS USED IN THIS DOCUMENT

See **Nasdaq Index Methodology Guide**.

APPENDIX A: ELIGIBLE EXCHANGES

Country	Operating Exchange
Australia	Australian Securities Exchange
Austria	WIENER BOERSE AG
Belgium	NYSE Euronext, Euronext Brussels
Brazil	BM&FBOVESPA S.A.
