

INDEX METHODOLOGY

OMX FINLAND SCREENED PI™ INDEX

OMXSUSTAINFIPI™

INDEX DESCRIPTION

The OMX Finland Screened PI Index measures the performance of a selection of the highest sustainability ranking securities among the most traded securities listed on Nasdaq Helsinki Ltd.

Institutional Shareholder Services, Inc. (ISS ESG) is responsible for the Environmental, Social and Governance (ESG) screening of securities to the extent set out in the Constituent Selection.

SECURITY ELIGIBILITY CRITERIA

To qualify for index inclusion, securities must meet the following Security Eligibility Criteria, which are applied as of the Reconstitution reference date.

Security universe

A security must be in the OMX Helsinki All-Share™ Index (OMXHPI™). Please refer to that methodology for further information.

Multiple classes of securities

Issuers with multiple security classes will be represented in the Index by the security class with the highest Nasdaq official aggregate turnover in Euro (EUR) during the twelve (12) calendar months starting twelve (12) calendar months prior to the Reconstitution reference date.

Geographic eligibility

The issuer of a security must be incorporated in Finland.

Other eligibility

The Issuer of a security not already in the Index as of the Reconstitution reference date ("non-Index Security") may not have entered into a definitive agreement or other arrangement that would likely result in the non-Index Security becoming ineligible.

The Issuer of a security already in the Index as of the Reconstitution reference date ("Index Security") that has entered into a definitive agreement or other arrangement that would likely result in the Index Security becoming ineligible soon after the Reconstitution effective date may be removed from the Index in conjunction with the Index Reconstitution.

CONSTITUENT SELECTION

Constituent selection process

An Index Reconstitution is conducted annually based on the Reconstitution reference date.

All securities that meet the Security Eligibility Criteria are ranked by Nasdaq official aggregate turnover in Euro (EUR) during the twelve (12) calendar months starting twelve (12) calendar months prior to the Reconstitution reference date and are considered for Index inclusion based on the following order of criteria.

- The top 80 securities by turnover will be considered for inclusion in the Index.
- The top 80 securities by turnover are subsequently ranked by Sustainability Score. Securities with missing Sustainability Score will not be considered for inclusion in the Index.
- Each of the top 35 securities by Sustainability Score will be selected for inclusion in the Index.
- The remaining 5 positions will be filled, in Sustainability Score rank order, by the highest ranked Index Securities within top 45.
- In the event that the constituent selection process described above results in fewer than 40 securities, the remaining positions will be filled, in Sustainability Score rank order, by the highest ranked non-Index Securities.

Other constituent selection process

Sustainability Assessment Rating Methodology

The ISS ESG Corporate Rating provides a detailed assessment of a company's environmental, social and governance (ESG) performance. With a pool of over 700 indicators in its research database (90% of which are industry specific), ISS ESG delivers a highly relevant and material analysis for every company in its research universe.

The areas and indicators assessed by ISS ESG are influenced by several factors such as international norms and conventions, social debate, regulatory changes and technological progress. In order to analyze a company's management of ESG issues within its core business, ISS ESG's sector specialists select an industry specific set of about 100 criteria from the pool of indicators available in the database. New indicators are added, as new issues get relevant for their sector.

To ensure the high quality of ISS ESG's analysis, updated indicators and rating structures are reviewed by a team of Research Directors with long-standing ESG experience. In addition, the inclusion of upcoming issues in the rating methodology is regularly discussed with ISS ESG's scientific advisory board, including highly recognized ESG experts.

Sustainability Assessment Rating scale

ISS ESG provides for the fact that the ecological and social challenges are profoundly distinct in individual sectors, as well as for companies and states, by assigning different Prime thresholds (minimum grades). Companies in the oil sector, for example, have to achieve a higher minimum grade than those in the software sector. This approach is sensible with regard to content and produces accurate results when considering individual sectors in isolation.

The overall analysis is graded on a twelve-point scale from A+ (the company shows extraordinary performance) to D- (the company shows no or very little engagement). To allow for cross-sector comparative analyses, these ratings are transformed into the “ESG Performance Score” (EPS), a numeric score ranging from 0 – 100. Based on this score, companies are selected according to their ESG performance.

CONSTITUENT WEIGHTING

Constituent weighting scheme

The Index is a free float market capitalization-weighted index. The free float market capitalization is calculated using the Index Security’s Total Shares Issued (TSI) and a Free Float Factor.

Constituent weighting process

An Index Rebalance is conducted semiannually based on the Rebalance reference date.

Index Securities’ index weights are determined by dividing each Index Security's issuer free float market capitalization by the aggregate issuer free float market capitalization of all Index Securities.

For additional information about index weighting, see [Nasdaq Index Weight Adjustment Guidelines](#).

INDEX CALENDAR

Reconstitution & Rebalancing schedule

Reconstitution Frequency	Annually
Rebalance Frequency	Semiannually
Reconstitution Reference Dates	Last trading day of October
Reconstitution Announcement Dates	After the close on the sixth trading day prior to the Reconstitution effective date
Reconstitution Effective Dates	At market open on the first trading day in December

Rebalance Reference Dates	<p>Coinciding with Index Reconstitution:</p> <ul style="list-style-type: none"> • For Total Shares Issued (TSI) and Free Float Factor, the same as used in the Index Reconstitution • For Last Sale Price (LSP), the last trading day prior to the Rebalance effective date <p>Not coinciding with Index Reconstitution:</p> <ul style="list-style-type: none"> • For TSI and Free Float Factor, the last trading day of April • For LSP, the last trading day prior to the Rebalance effective date
Rebalance Announcement Dates	After the close on the sixth trading day prior to the Rebalance effective date
Rebalance Effective Dates	At market open on the first trading day in June and December, respectively

Holiday schedules

The Indexes are calculated Monday through Friday, except on days when Nasdaq Helsinki Ltd is closed.

Index calculation and dissemination schedule

The Indexes are calculated during the trading day based on the Last Sale Price and are disseminated once per second from 09:30:01 to 17:16:00 ET. The closing value of the indexes may change up until 17:15:00 ET due to corrections to the Last Sale Price of the Index Securities.

INDEX MAINTENANCE

Deletion policy

If at any time other than an Index Reconstitution Nasdaq determines that an Index Security has or will undergo a fundamental alteration that would make it ineligible for Index inclusion, the Index Security is removed from the Index as soon as practicable as noted in the “Mergers & Acquisitions (M&A)” section of the **Corporate Actions and Events Manual – Nordics, Baltics, and SmartBeta Equities**.

Such fundamental alterations include, but are not limited to, a listing switch to an ineligible exchange, acquisition of more than 90% of outstanding shares, merger, or other major corporate event that would otherwise adversely impact the integrity of the Index.

On the Effective Date of the deletion, the Index Security will be removed at its prior closing price. For more information on the handling of bankrupt securities please refer to the “Bankruptcy” section of the **Corporate Actions and Events Manual – Nordics, Baltics, and SmartBeta Equities**.

Replacement policy

Removed securities are not replaced. Please refer to the “Mergers & Acquisitions (M&A)” section of the **Corporate Actions and Events Manual – Equities - Nordic, Baltic and SmartBeta Indexes** for further information.

Addition policy

Securities are not added in between Index Reconstitutions.

Corporate actions

Information on corporate actions and events handling can be found in the **Corporate Actions and Events Manual – Nordic, Baltic and SmartBeta Equities**.

The Index follows a “Market Cap Corporate Action Method for Indexes that Review Index Shares on a Periodic Basis”.

Index share adjustments

The Index follows a “Market Cap Corporate Action Method for Indexes that Review Index Shares on a Periodic Basis”. Please refer to the “Index Share Adjustments” section of the **Corporate Actions and Events Manual – Nordic, Baltic and SmartBeta Equities** for further information.

ADDITIONAL INFORMATION

Announcements

Nasdaq announces Index-related information via the Nasdaq Global Index Watch (GIW) website at <http://indexes.nasdaq.com>.

For more information on the general Index Announcement procedures, refer to the **Nasdaq Index Methodology Policy**.

Unexpected market closures

For information on Unexpected Market Closures, refer to the **Nasdaq Index Methodology Policy**.

Calculation types

For information on the Index calculation types as well as the mathematical approach used to calculate the Index(es), refer to the **Calculation Manual – Equities & Commodities**.
