

Nasdaq Riskalyze Index Family

Highlights

- The Nasdaq Riskalyze index family seeks to create better diversified portfolios with lower realized volatilities.
- One of the key features in the Riskalyze methodology is its sector neutrality in the U.S. and its country/sector neutrality internationally. All U.S. indexes are weighted to be sector neutral so that tracking error is minimized relative to each index's specified benchmark.
- Additionally, Riskalyze equally weights all individual stocks within their assigned sectors so that stocks' idiosyncratic risks are also minimized.
- The Nasdaq Riskalyze U.S. indexes include Large Cap, Mid Cap and Small Cap, which select all U.S. denominated dividend paying securities.
- The Nasdaq Riskalyze U.S. Large Cap Select Dividend Index functions as the high yield version of the Riskalyze U.S. Large Cap by only including dividend-paying securities with a yield higher than the U.S. Large Cap benchmark index yield.
- The Nasdaq Riskalyze Developed Markets and Emerging Markets indexes select up to 25 securities with the lowest volatilities in each country/sector assignment and employ a country/sector neutral weighting scheme to accomplish the same goal as the U.S. indexes.

Historical Performance

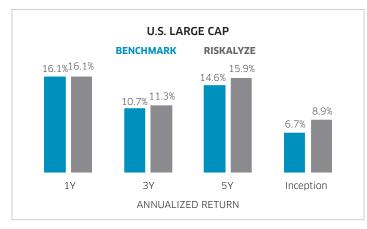

The following one-, three-, five-year and since inception total return and volatility comparisons show that the Nasdaq Riskalyze methodology accomplished its goal: Nasdaq Riskalyze indexes outperformed their benchmarks along with equivalent or lower volatilities.

			ANNUALIZED RETURN				ANNUAL VOLATILITY			
STRATEGY	MODEL	INDEX SYMBOL	1Y	3Y	5Y	INCEPTION	1Y	3Y	5Y	INCEPTION
