INDEX METHODOLOGY

NASDAQ GLOBAL ELECTRIFICATION TECHNOLOGIES AND SMART GRID™ INDEX

NQGETS™

INDEX DESCRIPTION

The Nasdaq Global Electrification Technologies and Smart Grid Index (the "Index") is designed to track the performance of a selection of companies engaged in the following Nasdaq Sub-Themes: Smart Grid, Smart Energy Transmission, Smart Grid Components, Smart Metering, Stationary Energy Storage, Clean Energy and Nuclear Power.

Nasdaq has created a theme and sub-theme classification process to review innovative technologies by analyzing millions of approved patents on a rolling two-years basis. The Index aims to select companies that may be innovative in their space based on their rolling two-year patent data.

SECURITY ELIGIBILITY CRITERIA

To qualify for index inclusion, securities must meet the following Security Eligibility Criteria, which are applied as of the Reconstitution Reference Date, unless stated otherwise.

Security Universe

A security must be included in the Nasdaq Global Disruptive Technology Benchmark2™ Index (NYDTB2™) as of the Reconstitution Effective Date. Please refer to the NYDTB2 methodology for further information.

Eligible Exchanges

A security must be listed on an exchange named in *Appendix A: Eligible Exchanges*.

Industries and Sectors

A security issuer must be identified by Nasdaq as involved in at least one of the sub-themes listed in *Appendix B: Nasdaq Themes and Sub-Themes*.

 © Copyright 2026, Nasdaq, Inc. All Rights Reserved.

Market Capitalization

A security's float-adjusted company market capitalization must be at least $500 million (USD).

Liquidity

A security must have a six-month average daily value traded (ADVT) of at least $2 million (USD).

Other Eligibility Criteria

If, at index reconstitution, Nasdaq becomes aware that an issuer or security will soon undergo a fundamental change that makes it ineligible, Nasdaq will remove the security from consideration. This includes entering into a definitive merger or acquisition agreement or other pending arrangement that would make it ineligible for index inclusion, or a filing of bankruptcy or similar protection from creditors, or other events as described in Section 3 of **Corporate Actions and Events Manual – Equities.**

CONSTITUENT SELECTION

Constituent Selection Process

An index reconstitution is conducted semiannually based on the Reconstitution Reference Date.

Securities meeting all applicable *Security Eligibility Criteria* are considered for inclusion in the Index. Index constituents are selected according to the following steps.

I. Assignment and Calculation of Nasdaq Scores

Eligible securities are matched with their issuers' Nasdaq Scores for each Nasdaq Sub-Theme represented in the Index (see *Appendix B: Nasdaq Themes and Sub-Themes* for a complete list). Companies receive scores for each theme in which they're involved, and no scores for themes in which they're uninvolved.

- Pure Score – The extent to which a company is involved in a particular theme relative to all other themes in which it is involved
- Contribution Score – The extent to which a company is involved in a particular theme relative to other companies involved in that theme

II. Comparison Groups Ranking and Exclusion

Securities are partitioned into Comparison Groups, the cross-sections of market cap segment (large, mid and small) and Sub-Theme.

Any security is removed from consideration if either its Pure Score or Contribution Score falls below the 50th percentile of its Comparison Group's scores.

Any security that is not in the Index as of the Reconstitution reference date is removed from consideration if either its Pure Score or Contribution Score falls below the 65th percentile of its Comparison Group's scores.

 © Copyright 2026, Nasdaq, Inc. All Rights Reserved.

An intensity score is calculated for each security. Intensity score is defined as the number of Sub-Themes in which the issuing company qualifies.

III. Foreign Ownership Exclusion

Any security is removed from consideration if it has a foreign ownership limit of less than 20%.

IV. Pooling and Selection

The securities still considered for index inclusion are partitioned into two security pools—Primary Subsector securities and High Relevance securities—that are used to determine the Index constituents. The Index contains up to 100 securities; the Index size is dependent on the size of two security pools. Index Securities are selected according to the following steps:

Primary Subsector and High Relevance Security Designation

- All securities belonging to Primary ICB Subsectors, named in *Appendix C: Primary ICB Subsectors*, are identified as Primary Subsector securities. All other securities are identified as High Relevance securities. ICB is a product of FTSE International Limited that is used under license.

Primary Subsector Security Pool Designation

- If fewer than 100 Primary Subsector securities exist, all are designated to the Primary Subsector security pool. Otherwise, Primary Subsector securities are ordered by Intensity Score (highest to lowest), average Contribution Score percentile (highest to lowest) and six-month average daily traded value (highest to lowest). Securities within the 100 first-ordered are designated to the Primary Subsector security pool.

High Relevance Security Selection

- A High Relevance security is removed from consideration if it has an Intensity Score equal to or less than the minimum Intensity Score among securities in the Primary Subsector security pool.
- High Relevance securities are ordered by Intensity Score (highest to lowest), average Contribution Score percentile (highest to lowest) and six-month average daily traded value (highest to lowest). A High Relevance security is selected for index inclusion if it is ordered within the first five percent (rounded down to the nearest integer) of the number of securities in the Primary Subsector security pool; e.g., if the Primary Subsector security pool consists of 99 securities, the four first-ordered High Relevance securities are selected for index inclusion.

Primary Subsector Security Selection

- Up to 100 Primary Subsector securities are selected based on the order determined above such that the Index does not exceed 100 total Index Securities, e.g., if the Primary Subsector security pool consists of 99 securities and four High Relevance securities are selected, the 96 first-ordered Primary Subsector securities are selected.

CONSTITUENT WEIGHTING

Constituent Weighting Scheme

The Index is a modified float-adjusted company market capitalization-weighted index.

Constituent Weighting Process

An index rebalance is conducted semiannually based on the Rebalance Reference Date.

Index Securities' initial weights are determined by dividing each Index Security's float-adjusted company market capitalization by the aggregate float-adjusted company market capitalization of all Index Securities. Initial weights are then adjusted to meet the following constraint:

- No Index Security weight may exceed 4.5%.

For additional information about index weighting, see **Nasdaq Index Weight Calculations**.

INDEX CALENDAR

Reconstitution & Rebalancing Schedule

Reconstitution Frequency	Semiannually
Rebalance Frequency	Semiannually
Reconstitution Reference Dates	Last trading day in November and May, respectively
Reconstitution Announcement Dates	After the close on the sixth trading day prior to the Reconstitution Effective Date
Reconstitution Effective Dates	At market open on the first trading day following the third Friday of January and July, respectively
Rebalance Reference Dates	Last trading day in December and June, respectively
Rebalance Announcement Dates	After the close on the sixth trading day prior to the Rebalance Effective Date
Rebalance Effective Dates	At market open on the first trading day following the third Friday of January and July, respectively

Holiday Schedule

The Index is calculated Monday through Friday and does not close for holidays, as it is a Global Index.

 © Copyright 2026, Nasdaq, Inc. All Rights Reserved.

Index Calculation and Dissemination Schedule

Index Values are made available on each trading day via the Nasdaq Global Index Watch (GIW) website at https://indexes.nasdaqomx.com/. Where applicable, Index values are available throughout the trading day.

INDEX MAINTENANCE

Deletion Policy

If, at any time, Nasdaq determines that an Index Security has or will become ineligible for continued inclusion in the Index due to bankruptcy, delisting, or a definitive agreement that would likely result in the security no longer being Index eligible, the security is removed from the Index as soon as practicable and is not replaced. Ordinarily, a security will be removed from the Index at its Last Sale Price. If, however, at the time of its removal the Index Security is halted from trading on its primary listing market and an official closing price cannot readily be determined, the Index Security may, in Nasdaq's discretion, be removed at a zero price. The zero price will be applied to the Index Security after the close of the market but prior to the time the official closing value of the Index is disseminated, which is ordinarily 17:16:00 ET.

Replacement Policy

Index Securities are not replaced between scheduled index reconstitution and rebalancing events.

Addition Policy

An initial public offering ("IPO") may be added to the Index outside of the semiannual *Reconstitution and Rebalancing Schedule*. To be considered, an IPO must meet the *Security Eligibility Criteria* as of the last trading day of February or August, as applicable, subject to the following modifications:

- for the *Security Universe* criterion, the IPO must be included in the Nasdaq Global Disruptive Technology Benchmark2 Index (NYDTB2) effective at market open on the first trading day following the third Friday of April or October, as applicable; and
- for the *Market Capitalization* criterion, the IPO must have a float-adjusted company market capitalization of at least $25 billion (USD).

If selected, the IPO is added to the Index effective at market open on the first trading day following the third Friday of April or October, as applicable. Upon addition, the IPO's weight is determined based on its float-adjusted company market capitalization as of the last trading day of March or September, as applicable, subject to a maximum weight of 4.5%. Existing constituent weights are adjusted pro-rata to accommodate the newly added security.

Corporate Actions

In the periods between scheduled index reconstitution and rebalance events, individual Index Securities may be the subject to a variety of corporate actions and events that require maintenance and adjustments to the Index. Specific treatment of each type of corporate action or event is described in **Nasdaq Corporate Actions and Events Manual – Equities**, which is incorporated herein by reference.

In certain cases, corporate actions and events are handled according to the weighting scheme or other index construction techniques employed. Wherever alternate methods are described, the Index will follow the "Non-Market Cap Corporate Action Method."

Index Share Adjustments

Other than as a direct result of corporate actions, the Index does not normally experience share adjustments between scheduled index reconstitution and rebalance events.

ADDITIONAL INFORMATION

Announcements

Nasdaq announces Index-related information via the Nasdaq Global Index Watch (GIW) website at http://indexes.nasdaqomx.com.

For more information on the general Index Announcement procedures, please refer to the **Nasdaq Index Methodology Guide**.

Unexpected Market Closures

For information on Unexpected Market Closures, please refer to the **Nasdaq Index Methodology Guide**.

Calculation Types

For information on the Index calculation types as well as the mathematical approach used to calculate the Index(es), please refer to the **Calculation Manual – Equities & Commodities**.

Recalculation and Restatement Policy

For information on the Recalculation and Restatement Policy, please refer to the **Nasdaq Index Recalculation Policy**.

Data Sources

For information on data sources, please refer to the **Nasdaq Index Methodology Guide**.

APPENDIX D: METHODOLOGY CHANGE LOG

Effective Date	Methodology Section	Previous	Updated
07/20/2026	Security Eligibility Criteria: Security Universe	A security either must be included in the Nasdaq Global™ Index (NQGI™) or must be listed on an exchange operated under Nasdaq – All Markets, New York Stock Exchange, Inc., or Cboe Global Markets Inc. Please refer to the NQGI methodology for further information.	A security must be included in the Nasdaq Global Disruptive Technology Benchmark2™ Index (NYDTB2™) as of the Reconstitution Effective Date. Please refer to the NYDTB2 methodology for further information.
07/20/2026	Security Eligibility Criteria: Multiple Classes of Securities	One security per issuer is permitted. If an issuer has multiple otherwise-eligible securities, one of which is an Index Security as of the Reconstitution Reference Date, only that security may be eligible; otherwise, only the security with the highest six-month average daily value traded (ADVT) may be eligible.	--
07/20/2026	Constituent Selection: Constituent Selection Process: Pooling and Selection: Subsector Cap	No Subsector is allowed to include more than 10 securities. If more than 10 securities are selected in a Subsector, the Subsector securities are ordered by Intensity Score (highest to lowest), average Contribution Score percentile (highest to lowest) and six-month average daily traded value (highest to lowest). Securities outside the 10 first-ordered are removed from the Index.	--
07/20/2026	Index Maintenance: Addition Policy	--	An initial public offering ("IPO") may be added to the Index outside of the semiannual *Reconstitution and Rebalancing Schedule*. To be considered, an IPO must meet the *Security Eligibility Criteria* as of the last trading day of February or August, as applicable, subject to the following modifications: • for the *Security Universe* criterion, the IPO must be

Effective Date	Methodology Section	Previous	Updated
			included in the Nasdaq Global Disruptive Technology Benchmark2 Index (NYDTB2) effective at market open on the first trading day following the third Friday of April or October, as applicable; and • for the *Market Capitalization* criterion, the IPO must have a float-adjusted company market capitalization of at least $25 billion (USD). If selected, the IPO is added to the Index effective at market open on the first trading day following the third Friday of April or October, as applicable. Upon addition, the IPO's weight is determined based on its float-adjusted company market capitalization as of the last trading day of March or September, as applicable, subject to a maximum weight of 4.5%. Existing constituent weights are adjusted pro-rata to accommodate the newly added security.
07/20/2026	Appendix C: Primary ICB Subsectors	--	Removed: Building Materials: Other (50101035), Electronic Equipment: Other (50202040), Machinery: Tools (50204040) Added: Machinery: Industrial (50204000), Specialty Chemicals (55201020)
